

LIFE GOES ON WITH EVERY BEAT OF THE HEART
PRIMEDIC™ EXTERNAL DEFIBRILLATOR SOLUTIONS

PRIMEDIC™
Saves Life. Everywhere.

A COMPANY WITH ITS FINGER ON THE PULSE...

Welcome to Metrax GmbH! We are a company, founded in 1973 in Rottweil, Southern Germany. We have been developing, producing and distributing high quality medical equipment for emergency medical care over 30 years. Our brand PRIMEDIC™ offers a comprehensive product range of external defibrillators for all areas of application. Safety and quality are our primary concerns – it goes without saying, therefore, every unit is assembled and configured in our own manufacturing facility. In other words, Made in Germany through and through.

A comprehensive quality assurance system in accordance with ISO 13485:2003 and extensive functional and quality tests guarantee the high quality of our products. We are able to react flexibly and to comply with our customers' special requests thanks to our know how, accumulated since we were founded.

This commitment and our consistent investment in research and development make Metrax GmbH a reliable and enthusiastic partner, both nationally and internationally.

A man and a young girl are captured in mid-air, jumping over a large, semi-transparent red banner that spans the width of the image. They are standing on a rocky shore next to a body of water. The man is on the right, wearing a white short-sleeved shirt and dark trousers, looking towards the right. The girl is on the left, wearing a yellow top and dark pants, with her hair flying in the air. The background shows a clear blue sky and green trees. The water is a vibrant blue-green color.

PRIMEDIC™ DIRECTS ALL ITS ENERGY TO THE ESSENTIALS ...

In Europe about 300,000 people a year die as a result of a sudden heart attack, the No.1 cause of death in the Western world. A sudden heart attack starts with an uncontrolled fluttering of the heart chamber, interrupting the pumping function of the heart, without immediate First Aid this leads to death within minutes. This short period between life and death is the only chance to save the patient's life. The rapid and immediate deployment of an external defibrillator, combined with manual cardio-pulmonary resuscitation, helps to significantly increase the chances of survival, (currently this is less than 5 percent without treatment).

In the knowledge of the hectic and especially demanding conditions experienced in such a situation, Metrax GmbH is developing user-friendly and efficient equipment with user guidance that accompanies and supports the First Aider throughout the entire rescue.

A man in a dark grey suit and tie stands in a parking garage. He is looking slightly to the right. A brown leather briefcase sits on the floor to his left. The background features a white pillar with a yellow band and a white brick wall. A red semi-transparent banner is overlaid across the middle of the image.

NEXT STEP ON THE CAREER LADDER

A photograph of four men standing on a soccer field. They are wearing yellow short-sleeved jerseys, dark blue shorts, and dark blue socks. The man in the center is taller than the others. They are standing on a green grass field with a red track in the background. A soccer ball is visible in the bottom left corner. The sky is blue with some clouds. A semi-transparent red banner is overlaid across the middle of the image, containing white text.

PRODUCTS WHICH YOU CAN RELY ON ...

The complete defibrillator programme from PRIMEDIC™ covers both automatic defibrillators (HeartSave AED) and professional defibrillators (DefiMonitor XD range), each of which are characterised by specific qualities:

Safety – PRIMEDIC™ equipment incorporates very high levels of safety and lightning-fast availability for use. For example, the equipment routinely carries out self-tests during inactive stand-by periods in order to be fully operational and shock ready when used.

User-friendliness – PRIMEDIC™ defibrillators are clearly laid out and provide simple and easily understandable operator guidance.

Technology – PRIMEDIC™ units are kept fully up to date with the latest state of the art technology through continuous development.

Robustness – The construction of PRIMEDIC™ devices is proven even under rough deployment conditions: impact-absorbing foam inserts and a sturdy plastic casing protect the technology and electronics.

Impulse discharge – In all PRIMEDIC™ equipment we use the heart-protection technology of the bi-phasic defibrillation impulse CCD.

Flexibility – Die PRIMEDIC™ equipment is modular. Each version of the equipment type can, if necessary, be expanded to the maximum equipment level. This makes the decision as to which unit to purchase easier.

Price/performance – Not least, the PRIMEDIC™ units are characterised by their attractive price-performance ratio.
